effectively, the sheet being one of the most dramatically clear geomorphological maps yet published.

The landforms of arid zones are particularly photogenic and Jean Dresch has chosen a particularly exciting set of photographs and images to illustrate them, especially the yardangs, kalour, hamada and erg of the Lout basin in Southeastern Iran. A transparent overlay on a Landsat colour composite brings out the complexity of the region extremely well. Equally striking are the photographs of semi-arid zone landforms, such as the glacis, the long foot-slopes for which there is not an adequate English word, of North Africa. The photographs show how glacis are often dissected by erosion, producing a series of slopes whose relationship to each other reflects an alternation of phases of lateral erosion and vertical incision produced by Quaternary climatic changes and neotectonics.

Perhaps the biggest contrast between this Atlas and a conventional presentation of geomorphology in English is the emphasis on structural features. All the classic fold structures of the French Alps are illustrated, including the overthrust escarpments of the Mount Lure and Esclangon areas. However, these are supplemented by photographs, images and maps from Africa, the Malagasy Republic and North America. The only image of Britain appearing in the Atlas shows the Great Glen Fault as an example of a fundamental feature in an ancient massif. One of the delights of the Atlas, however, is the large number of African, Latin American and Pacific examples used. Students will enhance their understanding of landforms of areas they have yet to visit by studying the relevant parts of this Atlas. A series of maps at the end of the Atlas indicates the localities for which illustrations are provided. The only error I found was the misplacing of images on pages 165 and 166 on these reference maps. Both French and English glossaries of geological and morphological terms are provided, defining terms like glacis and mekmen, but not kalout.

While any individual reader is unlikely to be fully satisfied with the range of features illustrated, personal interests expecting more of one thing and less of another, the committee which planned this Atlas is to be congratulated on a great achievement; a fascinating view of the world for the student and the armchair geomorphologist; a visual delight to be re-examined again and again; a demonstration of the vitality and catholic interests of French geomorphology; a powerful reminder of the growing role of remote sensing and the continuing role of mapping in geomorphology; a book to grab the interest of students and above all a political success in raising the funds to get such an Atlas published. Geomorphologists are fortunate to study such a beautiful planet and to have such a beautiful *New Atlas of Relief Forms* to help them do so.

EARTH SURFACE PROCESSES AND LANDFORMS

Issue No. 1, JANUARY–FEBRUARY

Surface Sealing as Influenced by Slope Angle and Position of Simulated Stones in the Top Layer of Loose Sediments: J. Poesen 1

The Significance of Rainsplash in the Surficial Debris Cascade of the Colorado Front Range Foothills: S. E. Morris 11

A Study of Dells in the New Forest, Hampshire, England: C. G. Tuckfield 23

Petrological Influence on Differential Weathering and Inselberg Development in the Kora Area of Central Kenya: K. Pye, A. S. Goudie and A. Watson 41

Rates of Erosion of Till in the Nearshore Zone: R. G. D. Davidson-Arnott 53

Photo-sieving: A Method for Grain-size Analysis of Coarse-grained, Unconsolidated Bedding Surfaces: H. Ibbeken and R. Schleyer 59

Hydrostatic-system Palsas at Toolik Lake, Alaska: Field Observations and Simulations: S. I. Outcalt, F. E. Nelson, K. M. Hinkel and G. D. Martin 79

A Re-examination of the Evidence for a Plio-Pleistocene Marine Transgression on the Chiltern Hills. I. Structures and Surfaces: A. J. Moffat, J. A. Catt, R. Webster and E. H. Brown 95

SHORT COMMUNICATIONS

An Indirect Method of Determining Magnitudes of Erosion using the c/p' Ratio: J. Pitts 107

The Permanence of Stream Networks in Britain: Further Comments: T. P. Burt and J. C. Oldman 111

BOOK REVIEWS 115

Issue No. 2, MARCH–APRIL

Arsenic in the Yellow River, China: H. Runhua 117

Debris from the Basal Ice of the Agassiz Ice Cap, Ellesmere Island, Arctic Canada: A. M. D. Gemmell, M. J. Sharp and D. E. Sugden 123

Rock Moisture Content in the Field and the Laboratory and its Relationship to Mechanical Weathering Studies: K. Hall 131

Dynamics of Bedload Transport in Turkey Brook, a Coarse-grained Alluvial Channel: I. Reid and L. E. Frostick 143

Tunnel Formation Processes in the Riverina Area of N.S.W., Australia: R. J. Crouch, J. W. McGarity and R. R. Storrier 157

Indexed or abstracted by 'Current Contents', 'Science Citation Index' and other leading Indexing/Abstracting Services.

A Re-examination of the Evidence for a Plio-Pleistocene Marine Transgression on the Chiltern Hills. II. Drainage Patterns: A. J. Moffat and J. A. Catt 169

Timing the Transport of Water through the Upper Vadose Zone in a Karstic System above a Cave in Israel: H. Even, I. Carmi, M. Magaritz and R. Gerson 181

Peat Slides in Teesdale and Weardale, Northern Pennines, July 1983: Description and Failure Mechanisms: P. A. Carling 193

Geomorphological Evolution of a Lowland Valley System during the Weichselian: J. van Huissteden, L. van der Walk and J. Vandenberghe 207

SHORT COMMUNICATIONS

A Comparison of Element Outputs in Solution, Suspended Sediments and Bedload for a Small Upland Catchment: B. Reynolds 217

Estimating Limiting Age for Pleistocene Erosional Surfaces in Central Montana by Uranium-series Dating of Associated Travertines: B. J. Szabo and D. A. Lindsey 223

BOOK REVIEWS 229

NOTES

Forthcoming Meetings 232

Issue No. 3, MAY–JUNE

A Re-examination of the Evidence for a Plio-Pleistocene Marine Transgression on the Chiltern Hills. III. Deposits: A. J. Moffat and J. A. Catt 233

Comparison of the Results of Quantitative and Non-quantitative Tracer Tests for Determination of Karst Conduit Networks: An Example from the Traligill Basin, Scotland: P. L. Smart, T. C. Atkinson, I. M. S. Laidlaw, M. D. Newson and S. T. Trudgill 249

The Influence of Weathering on the Geotechnical Properties and Slope Angles of Mudstone in the Mineoka Earth-slide Area, Japan: Y. Matsukura and K. Mizuno . . 263

Laboratory Simulation of 'The Wick Effect' in Salt Weathering of Rock: A. S. Goudie 275

Controls of Concentration and Loadings of Major Ions in a Stream Draining Intermediate Igneous Rocks: I. C. Grieve 287

Rilling of Hillslopes Reclaimed before 1977 Surface Mining Law, Dave Johnston Mine, Wyoming: E. J. Soulliere and T. J. Toy 293

Channel Erosion along the Carmel River, Monterey County, California: G. M. Kondolf and R. R. Curry 307

The Occurrence on Carboniferous Coal of Anthropogenic Origin in the Contemporaneous Vistula River Sediments near Cracow (Southern Poland): J. Rutkowski 321

SHORT COMMUNICATIONS

A Morphodynamic Model for Beach Gradients: J. Hardisty 327

An Investigation into the Relationship between Salt Weathering Debris Production and Temperature: A. P. Davison 335

BOOK REVIEWS 343

NOTES

Forthcoming Meetings 350

Issue No. 4, JULY–AUGUST

A Physically-based Model of the Dispersion of Splash Droplets Ejected from a Water Drop Impact: A. C. Wright 351

^{14}C Dating and Palaeoenvironment of the Historic 'Little Ice Age' Glacier Advance of Nigardsbreen, southwest Norwest: J. A. Matthews, J. L. Innes and C. J. Caseldine 369

Corroded Cobbles in southern Death Valley: Their Relationship to Honeycomb Weathering and Lake Shorelines: P. R. Butler and J. F. Mount 377

Erosional and Chemical Denudation Rates in the southwestern Idaho Batholith: J. L. Clayton and W. F. Megahan 389

Infiltration-excess caused by Stemflow in a Cyclone-prone Tropical Rainforest: S. R. Herwitz 401

Rainfall, Runoff and Erosion on Bare Arable Soils in east Shropshire, England: M. A. Fullen and A. Harrison Reed 413

Seasonal Changes in Surface Level of a Salt Marsh Creek: A. P. Carr and M. W. L. Blackley 427

Flow Variability and the Bankfull Depth of Sand-bed Streams of the American Midwest: J. E. Pizzuto 441

SHORT COMMUNICATIONS

Downslope Movement of *in situ* Clasts on Forested Hillslopes, Virginia: H. H. Mills 451

Determination of Dissolved Organic Matter in Streamwater using Visible Spectrophotometry: A Comment: B. Finlayson 457

Determination of Dissolved Organic Matter in Streamwater using Visible Spectrophotometry: A Reply: I. Grieve 461

Hydraulics of Runoff and Loess Loam Deposition: Discussion: H. J. Geldof 463
